## NOTES

FORTHCOMING ISSUES	ISSUE	RELEASE DATE
	November 2001	18 December 2001
	December 2001	22 January 2002
SEASONAL ADJUSTMENT	Seasonal adjustment is a means of removing the estimated effects of normal seasonal variations from economic time series so that the effects of other influences are obvious. Seasonal variations are the systematic (though not necessarily regular) intra-year movements of economic time series. These are often the result of non-economic phenomena, such as climatic changes and regular religious festivals, e.g. Christmas and Easter.	
TREND ESTIMATE	Smoothing seasonally adjusted series produces a measure of trend by removing the impact of the irregular component of the series. The trend estimates are derived by applying a 13-term Henderson weighted moving average to the respective seasonally adjusted series. Readers are reminded that trend estimates are subject to revision as subsequent months' data become available.	
CHANGES IN THIS ISSUE	There are no changes in this issue.

(a) Based on 2000 Statistical Local Area Boundaries.						
(b) Special Arrangements were put in place to obtain overseas migration data for September and December quarters 2000 and, as a consequence, the estimates resident population (ERP) at 30 September and 30 December 2000. Further information on notes can be obtained from the source publication listed below and Demography Working Paper 2001/1 — Estimating July to December 2000 Net Overseas Migration, available from the ABS website, <a href="http://www.abs.gov.au">http://www.abs.gov.au</a> .						
(c) Net overseas migration for March quarter 2001 is an assumption consistent with the medium net overseas migration assumption included in <i>Population Projections, Australia, 1999-2000</i> (Cat. no. 3222.0). Hence the resident population at 31 March 2001 is a projection.

(a) From April 2001 the Labour Force Survey was conducted using a redesigned questionnaire containing additional items and some minor definitional changes. Revisions have been made to core labour force estimates to ensure continuity, which have been published in table 3. However, this table contains estimates which have not been revised, so data from April 2001 onwards are not strictly comparable with earlier unrevised data.

*Information Paper: Implementing the Redesigned Labour Force Survey Questionnaire* (Cat. no. 6295.0) contains further information about the questionnaire changes and the revised series. For details on the content of the redesigned questionnaire, see *Information Paper: Questionnaires Used in the Labour Force Survey* (Cat. no. 6232.0).

(b) Total employed person counts for Feb 2000, May 2000, Aug 2000, Nov 2000 and Feb 2001 have been revised to reflect definitional changes introduced in Apr 2001 whilst counts of employed persons by industry, being non core data items, have not been revised. Hence the sum of each industry for the above reference periods will not add to total employed persons. See footnote a for further details.
